

Training Workshop for Regional WIGOS Centres functions and tools in RA VI

Santander, Spain, 20-22 November 2023

Role and Status of RWCs

(Romania/Romanian National Meteorological Administration)

Name of the presenter: Alina ORZAN

Position/Role of the presenter: database administrator/technical expert

Readiness Status

- Internal organization/Structure of RWC
 - RWC manager: *phd. Elena MATEESCU*
 - *RNMA is the National Meteorological Service in Romania*
 - *Romanian National Focal Point on WIGOS: phd. Ancuta MANEA*
- Readiness status
 - the Center will benefit from a suitable infrastructure with a good and stable internet connection
 - the specific software recommended by WMO will be downloaded, installed and run on the RWC s computers
 - *the human resources allocated to the Center will comprise specialists in meteorological data validation, IT and meteorological metadata*

Readiness Status

- Support to Members

- *The Center will monitor the data transmission from the allocated countries and perform the evaluation of the quality of the meteorological data. Within the evaluation action, the metadata registered in OSCAR/Surface will be taken into consideration for data with quality issues*
- *Based on this process, the specialist in data validation will decide, if there is the case, for issuing a ticket on Jira platform or not. The process will take into account Technical Guidelines for Regional WIGOS Centres on the WIGOS Data Quality Monitoring System*
- *If a ticket is issued (initiating an incident process), the Center will communicate with the Member in question through its National Focal Point designated for meteorological data quality, follow the process for solving the issue, update the ticket status and in case the problem is solved will close the ticket*
- *Proposed Members for affiliation are Lithuania, Republic of Moldova, Ukraine, Monaco, Andorra*
- *Language: english*

Thank you
