COUNTRIES COVERED

Malawi

The project aims to pilot AI integration into national forecasting workflows, building staff capacity through targeted training, and generating evidence and lessons to improve forecast accuracy, usability, and future scale-up.

OUTPUTS

- Tested AI-based weather prediction systems ; Bris Model and "forecast-in-a-box".
- Integrated AI-WP system into DCCMS's forecasting workflow.
- Improved forecast accuracy, lead time, and usability.

FOCUS AREAS

- Forecasting
- Early Warning
- Data Management
- Observations
- Service Delivery
